AWS SNS, SQS and SES Beginner Tasks

Amazon SNS

• Task 1: Create a Standard SNS topic named student-topic and view its ARN.

• Task 2: Subscribe your email and confirm the subscription.

• Task 3: Publish a message 'Hello from Amazon SNS' and verify email delivery.

• Task 4: Add another email subscriber and publish another message.

• Task 5: Publish a message using the AWS CLI.

Amazon SQS

• Task 1: Create a Standard queue named student-queue.

• Task 2: Send three messages: Hello, AWS, SQS.

• Task 3: Receive the messages from the console.

• Task 4: Delete the messages and verify the queue is empty.

• Task 5: Send a message using the AWS CLI and receive it from the console.

Amazon SES

• Task 1: Verify an email address.

• Task 2: Send a plain text email between verified addresses.

• Task 3: Send an HTML email with a heading and paragraph.

• Task 4: Send an email using the AWS CLI.

• Task 5: View sending statistics in the SES dashboard.
